(914)-707-2356 | Max.McEvoy@Colorado.edu | GitHub:mamc28 | [linkedin.com/in/max-mcevoy-mm01](https://www.linkedin.com/in/max-mcevoy-mm01)

## EDUCATION

**University of Colorado, Boulder** | Major: Computer Science, Minor: Business

- **Director of Finance**, HackCU XII, 2025-present
- **Relevant Coursework:** Computer Systems, Data Structures and Algorithms, Discrete Mathematics, Software Development Methods and Tools, Cybersecurity, Business and Financial Analytics I and II, Business Leadership

**Honors & Awards:** Dean's List (all completed semesters), GPA 3.7

## EXPERIENCE

**Broadridge Financial Solutions, Software Engineer Intern**, Fiduciary Analytics Team | *New York, NY* June-August 2026

- Developed and maintained ASP.NET Core 8 REST APIs powering Broadridge's SEC Rule 15(c) fund board analytics platform, contributing across a 14-project codebase with 80+ controllers, 90+ repositories, and 550+ service classes.
- Remediated security and code-quality issues identified by Checkmarx and SonarQube, strengthening input validation, authorization, exception handling, and logging across the application.
- Contributed to Jenkins CI/CD pipelines for automated builds, multi-suite testing, security scans, and artifact publishing.
- Built a Workday-style HR capstone prototype that streamlined employee referrals with real-time candidate tracking and actionable hiring, referral, and bonus metrics.

**Technologies:** .NET 8, C#, Checkmarx, SonarQube, React.js, GitLab, Jenkins, Jira, Maven, Git

**University of Colorado CU Boulder Hackathon XII, Director of Finance** | *Boulder, CO* September 2025-present

- Organizer at the largest hackathon in Colorado for over 200 students.
- Wrote grant proposals and funding requests securing over \$10,000 in sponsorships from industry leaders, local businesses, and the university to increase funding and build strong, lasting partnerships.
- Coordinated with admin to establish and maintain a budget for HackCU.

## PROJECTS AND SKILL DEVELOPMENT

**Coursera: Deep Learning Specialization** Fall 2025

- A 5-course series covering NNs, CNNs, RNNs, and Transformers incorporating dropout and batch normalization. Applied these models to real-world tasks such as NLP, speech recognition, chatbots, and machine translation using Python and TensorFlow.

**Coursera: Programming for Everybody—Getting started with Python, University of Michigan** Fall 2025

- Covered variables, conditionals, loops, and functions. Developed a strong foundation in writing basic programs and problem-solving.

**AWS SimuLearn: Cloud Practitioner Essentials Certificate** Summer 2025

- Developed a solid foundation in AWS cloud principles through 12 hands-on lab exercises, building basic solutions using security best practices, billing and pricing models, and AWS services such as compute, networking, databases, and security services.

**The Game of Life (C++)** December 2024

- Designed and implemented a fully functional terminal-based version of *The Game of Life* board game in C++. Developed my skills in integrating file I/O, array manipulation, and user interaction with multiple classes/structs working in tandem with each other.

**Scrabble Game Development (Java)** January 2024

- Designed and programmed a terminal-based version of *Scrabble* in Java, collaborating with a partner to implement game mechanics, player interaction, and scoring algorithms, resulting in a fully functional and engaging gameplay experience.

## TECHNICAL SKILLS & ACTIVITIES

**Languages:** Python, Java, C++, C, C#

**AI / ML:** PyTorch, Scikit-Learn, TensorFlow

**Data / Cloud:** Pandas, NumPy, AWS Lambda, DynamoDB

**Tools:** Checkmarx, SonarQube, React.js, GitLab, Jenkins, Jira, Maven, Git

## CERTIFICATIONS

**AWS:** Cloud Practitioner Essentials

## ACTIVITIES

CU Boulder Ski Club, HackCU, DJing
